

THE ROTHMAN ORTHOPAEDIC INSTITUTE

Foundation for Opioid Research & Education

# YEAR IN REVIEW 2021

The Rothman Opioid Foundation supports and advances the highest quality research on opioids and alternative pain modalities in order to yield findings that can better inform patients, physicians, and the greater health care community in the most evidenced-based pain management strategies.

We are a private foundation dedicated to funding and advancing research and education aimed at finding solutions to the opioid epidemic.

## MESSAGE FROM THE PRESIDENT

Despite still dealing with the COVID-19 Pandemic, 2021 was the Foundation's first full year of activity and it was a busy year indeed.

True to our mission, we tackled the Opioid Crisis in our immediate community as well as nationally by focusing on research, education, and advocacy. We hosted our first annual Summer Research Fellowship designed to train and inspire the next generation of Public Policy conscious medical professionals. We

designed the first of its kind opioid-prescribing curriculum for senior medical students. We performed and funded a number of research studies, several already accepted for publication. And, we held a number of discussions with our legislators yielding to our first state research grant. I want to acknowledge the Foundation Board for their dedication and our many donors for their generosity. We look forward to building on our success in 2021 for an even more successful and effective 2022.

ASIF ILYAS, MD MBA
